Email: [enquiry@rtkinstruments.com](mailto:enquiry@rtkinstruments.com)

**RTK**  
INSTRUMENTS

alarm occurred first in a particular group. To this end, three different first-up sequences and seven different first-up groups are available, all user programmable.

All configuration and maintenance can be carried out from the front of the unit by simply removing the IP65-sealed facia and withdrawing the cards. Inspection and maintenance can be undertaken live without any danger to personnel or plant.

The LN1000 is compatible with RTK Instruments' range of intrinsically safe audible and visual alarms and interface equipment. If required, RTK Instruments can specify, design, manufacture and commission a complete alarm system for the client's exact application and industry requirements.
