

## LN870 Intrinsically Safe Light Tower

New from RTK Instruments is the LN870 Intrinsically Safe Light Tower, which will provide status indication in both safe and hazardous area.

Each Light Tower can be configured up to five tiers high and in a choice of five super-bright colours, giving the customer the exact configuration they want.

Each tier is illuminated using a super-bright LED lamp which is current limited to only 20mA, using a unique prism cut lens and internal reflective cones visibility is improved in all ambient light conditions.

Certified to EEx ib IIC T4 allows use of the product in both Zone 1 and Zone 2 hazardous areas and two tiers can be driven from the same IIC interface. With the LED's low power consumption, low heat dissipation and long life expectancy, the LN870 is an ideal indicator for safe and hazardous areas alike.

There is a choice of pole or direct mounting, both incorporating a special vibration absorber.

A two page technical brochure is available describing the product in full.
